EDUCATION

Mar Baselios College of Engineering and Technology **Kerala,India**
Bachelor of Technology - Computer Science and Engineering . CGPA: 9.2 July 2023 - June 2027
Courses: Data Structures and Algorithms, Operating Systems, Computer Networks, Artificial Intelligence, Machine Learning, Data Science.

SKILLS

- Languages: Python, Java, SQL, C, Javascript, R
- Frameworks: Scikit, Tensorflow, Keras, Flask, Pytorch, Springboot, Thymeleaf, JDBC
- Databases: PostgreSQL, MySQL
- Tools & Platforms: Git, GitHub, MySQL Workbench, IntelliJ IDEA, VS Code, Postman, Linux, Windows, Arduino, AWS
- Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication, Leadership

EXPERIENCE

Saasvaap Techies Private Limited | Java Intern **Dec 2024 - Jan 2024**

- Completed hands-on training in Java-based full-stack web application development using Spring Boot, MySQL, HTML, CSS, and JavaScript.
- Built a Student Management System with user authentication and full CRUD functionality.
- Developed backend modules and RESTful APIs using Spring Boot to support application workflows and business logic.
- Integrated frontend and backend using Thymeleaf, creating responsive and user-friendly interfaces.
- Worked with JDBC and MySQL for database connectivity, query execution, and relational data handling.
- Strengthened problem-solving, debugging, and software development workflow skills through project-based implementation in a professional training environment.

PROJECTS

Mining Area Detection using U-Net (Ongoing)
Tech Stack: Python, PyTorch, OpenCV, NumPy, Matplotlib

- Developing a satellite image-based mining area detection system using U-Net for semantic segmentation, with domain gauidance from the Directorate of Mining & Geology, Thiruvananthapuram.
- Training the model on 256 × 256 image inputs for pixel-level classification of mining regions using PyTorch.

Facial Emotion Recognition
Tech Stack: Python, TensorFlow, Keras, OpenCV, NumPy, Matplotlib

- Developed a facial emotion recognition system using Python and CNN-based deep learning for image classification.
- Trained the model on 41,200 facial images across 7 emotion classes using TensorFlow/Keras.
- Implemented a computer vision pipeline using OpenCV for image preprocessing, feature extraction, and emotion prediction.

Lost and Found in a Campus Environment
Tech Stack: Spring Boot, MySQL, HTML, CSS, JavaScript

- Developed a campus-based Lost and Found web application to streamline reporting and tracking of lost and found items.
- Designed 2 core database modules for securely managing lost item and found item records.
- Implemented user authentication, image upload, and NLP-based matching to support item identification and notifications.
